Great ANNE, our Queen, now seated on the Throne,
Can, by just Right, call that great Sear her own,
There's now no room for any blind pretence,
Nor hopes for juggling Priests to bring their Prince,
The next Succession now, to end the stir,
Is seated on the House of Hanover:
Whose Radiant Beams, doth from the Leine shine
Towards Great Britain, 'twixt the Elbe and Rhine.

January hath XXXI Days.

*Bold Boreas now, breaks from his hollow Caves;
Rivers and Brooks are deck'd with Silver Waves.
The Bald-pate Woods are Perriwig'd with Wool,
Which Nature from the hide-bound Clouds do's pull.*

Yet, yet, fierce Boreas blusteringly doth storm,
At Nature's darling, which is newly born.
The tender Bud is curb'd by the Frost's Ire:
So cold it is, — the Pot may freeze by th' Fire.

The glorious Sun now ushers in the Spring:
And Birds melodiously sets Welcome sing.
Each thing revives on Land, as well as Seas,
And Sick-men are most sensible of ease.

has 6 Fair-Towns.

So that the whole number of Towns wherein
Fairs are kept is about 704; by which it ap-
pears, that whereas many of the Towns have
in the Year three or four Fairs each, the num-
ber of Fairs in England must needs be very
many.

So now

From Fair to Fair, O how the Chapmen trot!
Some go to buy, and some to sell, I wot;
Some for no other Ends but cheat and trick;
And some by Slight of Hand do Pockets pick;
Some pilfer Stalls, and some in holes do lurk,
Which at the end o' th' Fair brings Whipping work.

When thou see'st a Thief, consent not with
him, but rather reprove him for his Fault; and if
he repent and turn from the Evil of his ways, thou
may'st save a Soul from Death.

Sometimes Dick, Ralph and Bob to Fairs will go,
To meet their Mates and see a Puppet-Show;
Then Ralph bugs Kate, and Dick bugs bonny Nell;
And Bob courts Susan: Now, sure, all is well,
Moll turns to Tim, and Joan to smirking Ned,
And now I hope with Mates they all are sped;
Now Piper play, the Maidens all do dance
A Jigg, a Round, or some new Tune from France;
Cakes go to wreck, each Man drinks to his Friend,
The Pipers paid, and so the Fair doth end. A

An Astrologo-Physical Discourse.

Hippocrates and Galen confirm'd the pre-dominion of Humours to be the cause of all Diseases; and that the excitation of these Humours, is caused by the various and different Aspects and Positions of the Stars, &c. Therefore say they, it is best to let the Sanguine Blood, the Moon in ♋ or ♊; the Choleric, she being in ♌ or ♋; the Phlegmatick, she being in ♒ or ♑; the Melancholly, she being in ♈, ♍ or ♋. Also let her be in good Aspect of the fortunate Planets, and seated in a fortunate part of Heaven.

Purge with Electuaries, the ☾ being in ♌; with Pills, when she is in ♋; with Potions, when in ♍, and posited as before directed.

Vomits are reckoned by some very unsafe for all sorts of People and Constitutions: But this is a grand mistake; for a Vomit is necessary when no other Medicine will reach the Cause; as when the Distemper lyes above the Stomach, it being impossible for a Purge to carry it thence. Vomits are best given when the ☾ is in ♍, ♎ or ♒, in any good Aspect of ♄, ♀ or ☉.

Administer Glisters when the ☾ is in ♒, ♑ or ♎, and posited as before.

Good to stop Fluxes, Rheums or Issues, when the ☾ is in any earthly Sign, as ♍, ♎ or ♍: Of which Experience is a valuable Witness.

Very proper and good to Bathe when the ☾ is in ♌, ♍, ♎ or ♋, in good Aspect of ♀ or ♄.

The best time to cut Hair is, the ☾ being in ♍, ♒, ♑ or ♋, increasing in Light. These things seem to many as trivial, and not worth observing, yet were it more minded it would be found very beneficial, and the Locks of Venus not in so much Esteem by the Gallants of these times, &c.

Medicina M. M. Medela ab Altissimo.

Some Astrological Rules, very Excellent to be observed in Agriculture, common Husbandry, &c. as related by *Claudius Dariot*, and many other Excellent Philosophers.

These employed in Tilling the Ground, find by daily Experience that all Plants, Seeds, &c. produced out of the Womb of the Earth, receive both their Increase and Decrease by the motion and position of the Moon, and so it comes to pass, that the honest and pious Husbandman ought in sowing, planting, grafting, pruning, felling of Timber, and in all other things necessary in that kind, to be well acquainted with the Course and influences of the Moon and Stars. This *Virgil* not only mentions, but also approves of in his *Georgicks*. And the honest Country-man to whom I now write, that his Intent may be the better answer'd, must first of all have good regard to the Planet Saturn, that he be well fortified and assisted at the beginning of any work belonging to the Earth, by Reason he is the chief Ruler of Husbandry, and bears Dominion over all such Affairs. It is well, if possible, to let him be well beheld by Jupiter or Venus, and in some of his own Dignities, be sure observe he be not Retrograde, Combust, or Peregrine. Let him also be in good Configuration of the Moon, and free from the beams or ill influence of Mars; and let Mars be as weak as possible, as Cadent, Combust, Peregrine, and indeed void of all Dignities, both Accidental and Essential, &c.

Sow Grain or Corn the Moon increasing in Signs movable, as Aries, Libra, Cancer, Capricorn, but if she happen in Taurus, Virgo, Sagittary, Pisces, &c. let her be in Sexile or Trine of Saturn; If your Seed be of a moist nature, or the Land moist, then sow the Moon in Aries, Virgo or Capricorn, decreasing. If the Land and Seed be dry, let her be in Cancer or Pisces, in good aspect of Saturn, and they both, if possible, in good Aspect of Jupiter or Venus: But if your Land and Seed be of a middle condition, let it be sowed the Moon in Libra, well beheld as aforesaid, &c.

What you have a mind to plant, let it be when the Moon is in good aspect of Saturn, free from the body and ill Rays of Mars, and in a fixed sign, as Taurus, Leo, Scorpio, or Aquarius, and if it be possible, in good aspect of Jupiter or Venus.

For cutting Trees, let the Ascendant be Fixed, and the Moon placed

T R I G G E. 1708.

is a *Earthly sign*, as *Taurus*, *Virgo* or *Capricorn*, in a good aspect of *Saturn*.

Graft or *prune Trees*, the *Moon* in *Aquarius* and decreasing, but let her be in good aspect of *Jupiter* or *Venus*.

Cut down or *fell Timber* for *Building*, from *November* till *January*, the *Moon* decreasing in *Taurus*, *Virgo* or *Capricorn*, in good aspect of *Saturn*.

Plain Hedges, and *fell wood* for *Fewel*, that the *Stocks* may the better grow again, the *Moon* increasing in *Aries* or *Libra*; and let *Jupiter* or *Venus* assist her.

Cut Vines from *November* till *February*, and let the *Moon* be in *Aries*, *Taurus* or *Libra*: — *Remove Fices* her being in the same Signs; and in all these foregoing Months, in the last quarter of the *Moon*, *Dung* *Lana* to prevent the growing of *Weeds*.

Dig Gardens, plant *Herbs*, and set up *Hop-Poles*, the *Moon* in *Aquarius* or *Libra*.

Gather Apples, and other *Fruits*, *Herbs* and *Flowers*, to have them large and fair, the *Moon* increasing; and towards the *Full*: *Gather* them in a dry season, the *Moon* increasing, in good aspect of *Jupiter* or *Venus*, so they will keep well from putrefaction.

Shear Sheep, and cut *Grass* for *Hay*, the *Moon* increasing, and it will grow the faster and better.

Kill fat *Swine* near the *Full*, and the *Fat* shall hold boiling better, and longer, than that killed at other times.

Good Cattle, the *Moon* decreasing, and well aspected of *Jupiter* or *Venus*, and free from the ill Rays of *Saturn* or *Mars*.

Set Beans or *Pease* at the *New Moon*, and they will bloom and knit the better, says *Sir Chr. Heydon*, &c.

Plant Trees the *Moon* in *Aireal Signs*, which makes them shoot out, and in *Earthly Signs*, makes them root deep in the *Earth*, as is observed.

Mr. W. Tidmard, that excellent *Ancient Gardener*, observes, that *Trees* planted when the *Moon* is *burned*, grow *burned* and *forked* also.

Of the Eclipses this Year 1708.

THE Inhabitants of this Terrene Star will this Year be four times subject to the Luminarian Obscurity, (viz.) the *Sun* and *Moon* will be four times Eclipsed from our sight; the *Sun* twice, and the *Moon* as often: Which take as follows.

T R I G G E. 1708.

The first is of the *Sun*, on *March* the 11th about 6 in the morning, in the beginning of *Aries*, but not visible to us, by reason the Eclipse will be partly over before Sun-rising; and beside, had the *Sun* been clear above the Horizon at the beginning, it could not have been visible to us, in respect of the *Moon's* great South Latitude, augmented by her Parallax, which exceeds their Semidiameters.

The Second is of the *Moon*, and visible on the 25th of *March*, in about 15 degrees of *Libra*, or the Coelestial Balance: The beginning is on *March* the 25th, about 19 min. past 4 in the morning, the middle of the Eclipse is about 32 min. past 5, the end of the Eclipse is about 45 min. past 6 in the morning. The whole Duration is 2 hours and 26 min. Digits Eclipsed 5 d. 29. or about 5 parts and a half of 12 of the *Moon's* Body will be darken'd from our sight.

The Third is of the *Sun*, *September* 2. and will be visible to us if Clouds interpolate not. It falls in the last Face or Decanade of *Virgo*. It begins *September* 2. at 10 hou. 3 min. *P. M.* or more plain, the third day, at 3 min. past 7 in the morning, and ends at 57 min. past 8. Total Duration is 1 hour and 54 min. and Digits or Parts Eclipsed is about 6, which is half the *Sun's* Body darken'd.

The Fourth and last is of the *Moon*, on *September* 18. in the Evening, in about 7 degrees of *Aries*: The time of the beginning is about 8 at night, the middle about 21 min. past 9, and the end at 22 min. past 10 at night. The total Duration is about 2 hou. Digits Eclipsed near 4. But Mr. *Gadbury* in his Types makes it 13, and total. Let Time discover the Truth.

¶ Authors tell us, That an Eclipse of the *Sun* in the first Face of *Aries*, or the first ten degrees thereof, which you please, as the first Eclipse of this Year being of the *Sun* doth, that it does denote sudden and frequent motions of Armies; with hasty Expeditions, Assaults and Batteries, as also many Tumults, Seditions and Controversies; and that the Air shall be inclin'd to intemperate Heat and Drought.

And that when an Eclipse of the *Moon* shall fall in the second Face of *Libra*, as the second Eclipse of this Year which you see is of the *Moon* doth, it will bring much Mischief and Trouble to Mankind in general: And that when an Eclipse of the *Sun* shall fall

fall in the last Face of *Virgo*, which the third Eclipse of this Year being of the *Sun* doth, that then many shall suffer by Merchandizing, and such as live by Ingenuity; and that much Slaughter, Destruction and Banishment, shall befall many; as also that Poets shall suffer much: In Troth they are generally poor; which I think the Plague of Poverty is enough, without being threaten'd by the *Sun*, *Moon*, &c.

Also that when an Eclipse of the *Moon* shall fall in the first ten Degrees or Face of *Aries*, as the fourth and last Eclipse of this Year doth, and is visible, they say it denotes Feavers, destruction of Woods by Fire, and a dryness of the Air, and such like. And thus I end my Discourse about Eclipses this Year; and shall in the next place acquaint my Reader, that on the 16th day of *June*, this Year, there happens a notable Square of *Saturn* and *Jupiter*; and also on the 29th of the same Month, they are within Orb a great while: And I wish the World is not made sensible of its effects. Remember *Saturn* is in *Gemini*, and *Jupiter* in *Virgo*, both Human and barren Signs. God preserve the City of *London* from Sicknes; and bless us from Drought, and a Scarcity of the Fruits of the Earth.

Besides, this Year produces a Conjunction of *Saturn* and *Mars* on the 6th of *September*, in the beginning of *Cancer*; and also an Opposition of *Jupiter* and *Mars* from *Virgo* and *Pisces*, *Jupiter* in *Virgo* and *Mars* in *Pisces*: These are notable Configurations, and portend something more than what is common. Therefore let us sincerely call upon God, and pray that he will continue his Blessings to us of this Island, and all Her Majesties Dominions; and then,

Oh! who shall tell! who shall describe thy Throne!

Thou Great THREE-ONE!

There, thou thy self dost in full presence show,

Not absent from the meaner Art below:

No, if thou wer't, the Elements League would cease,

And all thy Creatures break thy Natures Peace.

The Sun would stop his course, or gallop back,

The Stars drop out, the Poles themselves would crack:

Earths strong Foundations would be torn in twain,

And this vast work all ravel out again

To its first Nothing. — Cowley Davids, Lib. 1.

I shall now in the next and last place, take Notice of the Four Seasons or Quarters of the Year, and consider them as usual, with a short Judgment on each of them. And,

I. Of the Vernal or Spring Quarter.

NOW the Spring, which of all the Four Quarters is the most pleasant and delightful, takes its beginning when bright *Sat* mounts the first scruple of the Sign *Aries*, or Celestial *Ram*, it being the first and principal Sign in the Zodiac, and wherein the *Sun* is exalted; and is this Year on *March* the 9th, about half an hour past Noon. Now the Days and Nights with us are of equal length. This is the most charming Quarter in all the Year, and holds while the *Sun* marches through the *Ram*, *Bull* and *Twins*; that is, *Aries*, *Taurus* and *Gemini*. In the first of which small Birds couple, and sing sweetly on the Boughs of the new budded Trees, which soon become green and flourishing, most pleasant to behold. The second brings in the Welsh-Ambassador (commonly called the Cuckoo) and will cause the Citizens Wives to have an itching mind to ramble into the Country, as to *Tunbridge*, *Epsom*, *Hampstead*, &c. to meet their Gallants. The third will encourage *Tom*, *Nel*, *Dick*, *Bob*, and the rest of the merry Train, to meet *Doll*, *Kate*, *Nell*, *Prue* and *Shu*, to eat a Silibub at Mother *Nabs* near *Conspicuous*. But the Devil on't is, the Old Woman sells Plumb-cakes also, which oftentimes prove very prejudicial to the Young Women; who by eating of them, drinking Silibub, and doing something else, get such a Swelling in their Bodies, that can by no means be asswaged under Nine Months Time: Therefore,

My pretty Lassies have a care,
A Maiden head it is but brittle ware.
A young Man may embrace and hug his Lass:
Nay more than this, may lay her on the Grass.
This is no other than a loving Charm;
In doing which I'm sure there is no harm.
So far as this, the Law doth not deny;
Keeping within the bounds of Chastity.

And in observing these Rules you need not fear being troubled with the Rising of the Mother, nor of being conveyed home by the weeping-crofs from your Service, to your Father's House.

T R I G G E. 1708.

The Astronomical Rulers of this Quarter are *Mars*, *Venus*, and *Mercury*. When the *Sun* passes through *Aries*, being the House of *Mars*, all Vegetables put forth their Leaves and Blossoms. And now *Nature* pretends her self like a lovely Dame; and all things look with vigour: *Mars* like.

II. *The Ætival, or Summer Quarter.*

WHich begins when bright *Phœbus* touches the first Point of *Cancer*, which is this Year on *June* the 10th, near One in the Afternoon: And now the Days are at the longest. This Quarter holds while the *Sun* passes thro' *Cancer*, *Leo*, and *Virgo*. The Rulers are the *Moon*, *Sun*, and *Mercury*. The *Moon* rules *Cancer*; and now the delightful Birds of the Spring bring forth young ones. (Maids have a care.) Next bright *Sol* rules in the Sign *Leo*; and by his Heat ripens the Seeds of Herbs, Flowers, &c. Next comes *Mercury*, who bears Rule in *Virgo*, and brings all things to a full Ripeness, and makes the Corn fit for the Sickle. So that,

Now the young Men and Maids march hand in hand,
Like Marshal Troops they swarm throughout the Land:
Some with the Sickle, some with the Fork and Rake.
When in the Field they come, what work they make?
O're Wheat, Rye, Oats and Barley, they prevail:
And then the Thrasher bangs it with his Fiail.

Which brings me to the

III. *Or, Autumnal Quarter.*

WHich this Year commenceth on *September* the 12th, about 2 in the Morning, and holds while the *Sun* passes thro' *Libra*, *Scorpio*, and *Sagittarius*; and is govern'd by *Venus*, *Mars* and *Jupiter*. *Venus* rules *Libra*, and compassionately distills her Tears on the deceased *Summer*, and causes (though but short) another Spring. Then stout *Mars* governs *Scorpio*, who adds Heat to the moisture of his beloved *Venus*: But holds not; the *Sun* with-drawing towards the Southern Tropick, it cannot be supported. Lastly, *Jupiter* governs *Sagittarius*, and endeavours to compleat what *Mars* and *Venus* have begun; and by his Verrue conserves all Herbs, Plants and Flowers, for the future benefit of Mankind. Which brings me to the next, and is,

IV. *The*

IV. *The Brumal or Winter Quarter,*

WHich begins when the *Sun* enters *Capricorn*; and is this Year on *December* the 10th, a little past 4 Afternoon. Now the Days are at the shortest; and this melancholly Quarter, while the *Sun* passes thorow *Capricorn*, *Aquarius* and *Pisces*; *Saturn* has a double dominion, as Ruling *Capricorn* and *Aquarius*; yet *Jupiter*, who governs *Pisces*, comes in for the latter part hereof, and happily succours the Seeds of Vegetables in this Quarter. All things look, like old *Saturn*, very unpleasant, with Mists, Fogs, Frosts, thick Clouds, Snow, &c.

And now the bonny Lass that in the Spring,
Did dally, sport, and do the other thing,
With the blind Wagg, Dame *Venus's* only Boy,
May now cry out, Alas and well a-day.

And now you see how the Yearly Seasons are made, and how they are maintain'd by a struggling Interest: You also see how old *Saturn* (as the Heathens feign) does devour his own Issue: And also, how mild *Jove*, ruling *Pisces*, puts us in hopes of a new Spring.

And lastly, by this Rule you may observe how the Planets govern the several Seasons of the Year; and may also serve to mind us of the several parts of our Lives. The Spring represents Youth; the Summer, Manhood; Autumn our declining Years; and cold Winter, old Age: Where old sullen *Saturn*, stands frowning with his sharp Scythe to cut us down, and by the Honour of the greatest Monarch in the Dust. And thus I end this Year with God Preserve the most Glorious and Renowned Queen of *Great Britain*, *France* and *Ireland*; and grant Her long to Reign over us. Amen.
